

Richard Hobbs, MA, FRCGP, FRCP, FRCPE, FESC, FMedSci

Richard Hobbs is Professor and Head of the Nuffield Department of Primary Care Health Sciences at the University of Oxford, UK. He is National Director of the National Institute for Health Research's School for Primary Care Research, and was co-director of the NHS Quality and Outcomes Framework review panel from 2005 to 2009.

Professor Hobbs sits on several national and international scientific and research funding boards, including the Council of the British Heart Foundation and, until recently, chaired the British Primary Care Cardiovascular Society Board and the ESC Council for Cardiovascular Primary Care. He currently chairs the European Primary Care Cardiovascular Society.

Professor Hobbs' research interests focus on cardiovascular epidemiology and clinical trials, especially in vascular and stroke risk, and heart failure. His publications include 28 book chapters, 12 edited books, and more than 360 original papers in such peer-reviewed journals as the *Lancet*, the *Annals of Internal Medicine*, *BMJ*, *Atherosclerosis*, the *European Heart Journal*, and *Stroke*.

Professor Hobbs' research has been influential in the development of international health policies and clinical guidelines. Within the National Health Service, he has consulted on National Service Frameworks for coronary heart disease, atrial fibrillation, heart failure, and several NICE Clinical Guidelines.

He has been a physician in general practice for over 30 years, serving an inner-city community.

Professor Hobbs has a member of Atrial fibrillation Association's Medical Advisory Committee since May 2014.
