

take fainting  to heart

There is no such thing
as a simple faint

STARS

Syncope Trust And Reflex anoxic Seizures™

www.stars-international.org

Did you know?

- ♥ Up to 50% of people will experience a faint (blackout) during their life
- ♥ Approximately 30% of adults and up to 40% of children diagnosed with epilepsy in the UK do not have the condition
- ♥ The UK's biggest killer is sudden cardiac arrest: the first and only symptom could be a faint

The cause?

It could be an underlying, potentially fatal, arrhythmia (heart rhythm disorder)

Help us to increase awareness of faints and their link to arrhythmias during 2018 - our 25th Anniversary year.
