Syncope, a type of blackout, is caused by a problem in the regulation of blood pressure or sometimes with the heart.

Up to 50% of the population will lose consciousness at some point in their life due to syncope. Syncope can affect all age groups but the causes vary with age.

take fainting to heart

STARS provides support and reassurance through:

- A dedicated help and support telephone line
- Our online forum to share information, questions and advice
- Sharing specialized awareness and information booklets for all ages
- Access to our support group meetings to chat with others and share experiences
